Dressing table of 'Beautiful Women'
Design Marcel Wanders

quodes[©]

BEAUTIFUL WOMEN by MARCEL WANDERS signals the return of a type of furniture that has all but disappeared.

The dressing table consists of a mirror with a richly decorated frame and a glass shelf, a small dresser, in two variations, a storage stool and a side table.

The sober dresser features a sunken top and cast brass handles in the shape of an apple and a snake, a reference to the first woman.

The more baroque cabinet features a spherical, massive wooden foot on which a top has been fitted.

The stool, with its graphic design and round forms, refers to the 1960s.

In addition, in 2009 the stool is transformed into a side table with glass top.

The series is a post-modern ensemble intended as a tribute to womankind.

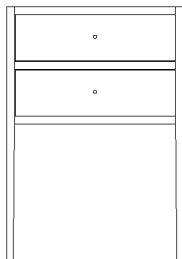

Quote by the designer about Beautiful Women:

"Luxury is to live an exciting passionate life in comfort and commitment, to feel you are special and make a difference while achieving personal growth, to contribute to the greater good and feel you share love".

"Luxury starts where functionality ends and where the true value is personal and so has no price or reason".

Marcel Wanders, Designer

Kate

Dimensions

Length: 50 cm
Wide: 31 cm
Height: 72 cm

Kate features a sunken top, which allows practical storage.

It has 2 drawers and one inlay, from which the bottom is covered with white leather.

Materials

The dresser is available in: solid ash wood, stained in black. The top and the drawer fronts are lacquered in satin white.

On request, Kate could be made of solid walnut, mat lacquered. The top and the drawer fronts are lacquered in satin white.

The handles are made of solid brass. Stem of the apple, tongue / tail of snake are 'realistic' and therefore a little sharp.

The white leather is retained from a cow.

Note regarding ash wood: when stained in colour, the beautiful wood structure has exactly the same character as solid oak. In addition, ash wood is extremely durable (like the wooden grip of a hammer) and the humidity percentage of the purchased solid wood is excellent for high quality manufacturing.

Delivery, transportation

We deliver Kate in a well developed carton packaging, including several internal supports. The carton has the highest possible export quality

For some export destinations, we deliver in a wooden crate.

Transportation: handle the elegantly slim legs of Kate with great care in case of transportation.

Maintenance

The cabinets are made of high quality solid wood. Solid wood has its own natural characteristics and may show knots, deformations and black spots. Open defects are allowed in non-visible areas to the extent that the normal product strength are not influenced.

Solid wood 'works', which means that over time natural little cracks may appear. A constant temperature and humidity of the air are important for a 'lifetime' preservation.

For the optimal preservation it is important to avoid any contact with sharp, hot or chemical liquids. Remove moist spots as soon as possible.

Keep the surfaces clean with a dry cotton cloth. If required use a moist cloth or a little bit of soapy water, clean in the direction of the wood structure and finish the cleaning with a dry cloth again. Never use any chemical cleaning liquids and / or abrasives.

Remove liquids preferably within 15 minutes.
